

Important Note: This table is to be used as a guide only and is provided subject to the disclaimer that can be accessed at the bottom of AEMO's website. It is important to note that this list details the NMI ranges that have been allocated to participants. This **does not** imply that the participant that is allocated the NMI is/ or shall remain an active participant or NSP for the NMI.

State Territory	Network Service Provider	Participant ID	NMI Block			NMI Block	
			From	To	Excluding	From	To
ACT							
	ActewAGL Distribution	ACTEWP	NGGG000000	NGGGZZZZZZ	NGGGW.....	7001000000	7001999999
NSW

MISC							
	Federal Airports Corporation (Sydney Airport)		NJJJNR0000	NJJJNRZZZZ			
	Exempt Networks - various (see note 5)		NKKKNR0000	NKKKNRZZZZ		7102000001	7102999999
	AEMO Reserved block 1					8801000000	8805999999
	AEMO Reserved block 2					9000000000	9999999999

Notes

- Characters "O" and "I" are not to be used to avoid confusion with numbers 0 and 1.
- Refer to "National Metering Identifier Procedure (NMI)", AEMO document No. ME_GN059 for detailed explanation of NMI structure.
- DNSP's are free to allocate any combination of alpha-numeric characters in the block issue detailed above excepting exclusions detailed above (e.g. cannot use "W" as fifth character, cannot use characters "O" and "I").
As an example, the block release of VAAA000000 to VAAAZZZZZZ means the range of alpha characters A to Z excluding "O" and "I". Numeric characters 0 to 9 are available to fill the six character positions following VAAA, except for exclusions noted above (eg cannot use "W" as fifth character). The DNSP may allocate NMI's within this range in any format they wish.
- Exempt Networks - blocks are allocated by AEMO to individual exempt networks within this grouping.
- tni = use of applicable TNI code within the NMI allocation.
